

Luiz Felipe Diniz

Campinas, SP - Brazil | luizd97@gmail.com | linkedin.com/in/levin-diniz | github.com/luizlevindiniz

EDUCATION

Virtual State University of São Paulo (UNIVESP)

Bachelor's Degree in Computational Engineering

São Paulo, Brazil

July 2022 – Present

State University of Campinas (UNICAMP)

Bachelor's Degree in Food Engineering

Campinas, Brazil

March 2016 – June 2021

EXPERIENCE

Codeminor42

Software Developer

Remote

Jan 2025 – Present

- Developed the frontend checkout flow for a Brazilian ticketing platform using Next.js and TypeScript; the solution was featured in a [post](#) on the Codeminor42 Blog.
- Delivered a full-stack volunteer management system using Ruby on Rails, enabling a non-profit to coordinate 400+ volunteers and logistical operations across 10 coastal locations in Rio de Janeiro, significantly reducing paperwork and manual processes.
- Optimized loan-related processes for a US-based loan management firm, refining the core logic behind loan payoff calculations.
- Enhanced the UI of internal Codeminor projects using Tailwind CSS and Hotwire.

Encora LLC

Software Developer

Remote

Mar 2024 – Jan 2025

- Developed frontend features for a major British telecommunications enterprise, leveraging React and TypeScript to build accessible interfaces for high-traffic user portals.
- Contributed to internal engineering initiatives while deepening expertise in technologies like CSS, HTML, and JavaScript.

BTG Pactual Bank

Software Developer

Hybrid

Aug 2023 – Feb 2024

- Built a dashboard application integrating React, TypeScript, and FastAPI for the derivatives trading team; implemented direct query interfaces via AWS Athena SDK to provide daily asset data.
- Designed and deployed AWS Lambda functions, automating the ingestion and normalization of datasets into internal bank systems.

PROJECTS

Parli | *Next.js, TypeScript, Tailwind CSS, Stripe, Supabase*

- Architected a comprehensive SaaS for language tutors using Next.js and Supabase. Integrated Stripe for payment processing and engineered a dashboard for student/class management.

Fernando Belotto | *Next.js, TypeScript, Tailwind CSS*

- Delivered a highly performant, SEO-optimized portfolio site for a client.

G3A | *Next.js, Shadcn UI*

- Developed a modern corporate interface for a property regularization firm utilizing Shadcn UI components for consistent design systems.
