

LUIZ FELIPE DINIZ

Campinas, SP - Brazil | luizd97@gmail.com | linkedin.com/in/levin-diniz | github.com/luizlevindiniz

PROFILE

Full-stack Software Engineer with 3+ years building SaaS products and internal platforms using Ruby on Rails, React, Next.js, and TypeScript. Proven track record of delivering solutions for Brazilian and international clients through consulting engagements, with a strong background in product development and automation.

EXPERIENCE

Codeminers42 (Consulting)

Full-stack Software Engineer

Client: GLS.AI (US)

Remote

Jan 2025 – Present

- Built an asynchronous document ingestion system using Active Storage, AWS S3, and Temporal to orchestrate batch uploads and background processing of 100+ documents/day, replacing manual handling workflows.
- Designed a multi-contact notification system supporting multiple emails and addresses per user, improving reliability and reducing the risk of missed system notifications.
- Created a foreclosure management dashboard using Ruby on Rails and Hotwire to support real estate-backed loan workflow tracking and operational monitoring.

Client: Praia Para Todos

- Automated core operational workflows using Ruby on Rails and Active Admin, digitizing paper-based processes and saving dozens of hours of manual work per week.
- Integrated a third-party electronic signature system via webhooks to automate document approval pipelines and eliminate manual processing steps, reducing approval friction.
- Developed interactive forms and dynamic user interfaces using Hotwire (Turbo and Stimulus), improving the user experience across the platform.

Client: Diversos Ingressos

- Architected a checkout state machine using Next.js and TypeScript to manage ticket purchasing flows, enhancing session consistency and seat reservation reliability.
- Improved application performance and SEO with hybrid Static Site Generation (SSG) and Server-Side Rendering (SSR), reducing page load latency and improving search engine discoverability.
- Integrated frontend applications with backend APIs to ensure real-time synchronization of purchasing sessions and ticket availability.

Encora (Consulting)

Software Engineer Intern

Client: BT Group (UK)

Remote

Apr 2024 – Jan 2025

- Refactored and maintained production-grade web applications using React, TypeScript, and Styled-Components for large-scale telecommunications platforms, improving maintainability and UI consistency.
- Developed cross-platform desktop communication tools using Electron to support internal enterprise routines.
- Improved code reliability by implementing unit and integration test suites with Jest and React Testing Library, raising coverage to 90%.

BTG Pactual

Automation Intern

Hybrid

Sep 2023 – Feb 2024

- Built internal tools using React and FastAPI for equity analysts to access and analyze financial data, directly supporting trading desk operations in a production environment.
- Integrated AWS Athena to query and visualize large financial datasets, enabling faster access to daily asset information.
- Automated internal banking processes through AWS Lambda functions, scheduled jobs, and serverless data ingestion pipelines.

SKILLS

Languages: TypeScript, Ruby, Python
Frontend: React, Next.js, Hotwire, Tailwind CSS
Backend: Ruby on Rails, Node.js, FastAPI
Testing: Jest, React Testing Library
Databases: PostgreSQL, Supabase
Cloud & DevOps: AWS (S3, Lambda, Athena), Docker, GitHub Actions, Temporal
Spoken Languages: Portuguese (Native), English (Professional), Spanish (Conversational)

PROJECTS

- Parli | *Next.js, TypeScript, Supabase, Stripe*
- Released a multi-tenant SaaS platform for language tutors.
 - Implemented authentication, subscription billing, student management, and class scheduling features.
- G3A | *Next.js, TypeScript, shadcn/ui*
- Delivered a modern corporate website for a property regularization firm.

EDUCATION

Virtual State University of São Paulo (UNIVESP) <i>B.Sc. in Computer Engineering</i>	São Paulo, Brazil
State University of Campinas (UNICAMP) <i>B.Sc. in Food Engineering</i>	Campinas, Brazil
